

MAG BRAKE FLUID DOT 3

BRAKE FLUID

Product Description:

MAG BRAKE FLUID DOT 3 is a high quality synthetic fluid used for automotive brake and clutch systems, with high viscosity index to give superior performance over a wide temperature range.

Features and Benefits:

It is miscible with all other synthetic fluids of similar quality. MAG BRAKE FLUID DOT 3 has good vapor lock characteristics. It is compatible with rubber seals and hoses and provides corrosion protection for metals.

Additional Quality Features:

- Synthetic Fluid
- Good wear and corrosion protection
- Resistant to moisture absorption
- High dry and wet boiling points.
- Viscosity suitable at cold as well as high temperatures

Performance Level:

Meets the specification of SAE J1703 and FMVSS 116 DOT 3

Physical Characteristics

Grade	DOT 3
Density @ 15°C	1.02
Kinematic Viscosity @ 100°(cSt)	1.5
Kinematic Viscosity @40°(cSt)	1200
Equilibrium Reflex B.P	240
Wet Equilibrium B.P (C)	145

Note: All figures may vary slightly.

Health and Safety:

Please refer to the Safety Data Sheet, which is freely available to all our customers upon request.
