

MAG Lithium Complex Grease EP Series

MAG LITHIUM COMPLEX EP Series, are a premium quality lithium complex soap based multipurpose greases manufactured from superior quality base stocks with specially selected additives.

KEY FEATURES :

- 1) Excellent thermal and oxidation stability
- 2) This grease also provides protection against rust and corrosion.
- 3) Having moderately high drop points, resistance to oxidation, good Thermal and structural stability.
- 4) Extended bearing life

APPLICATION:

LITHIUM COMPLEX EP series are suitable for all types of industrial applications in steel plants, mining, cement and different engineering industries as excellent multipurpose greases.

PERFORMANCE LEVEL:

Meet IS-14847:2000

TYPICAL CHARACTERISTICS		
TYPICAL PROPERTIES	EP-2	EP-3
Type of Soap	Lithium	Lithium
Colour	RED	RED
Work Penetration at 25°C	280	240
Drop Point °C,	230	230

HEALTH AND SAFETY:

Based on information available, this product is not likely to pose any advance effect on health provided It is used as per the recommendation For more information refer MSDS For disposal check local regulations and take care to protect the environment
